

## Resources

We are here to be a resource for students, organizations, staff members, and faculty who are interested in working towards helping foster a healthy, inclusive, and equitable Carolina Community. To that end, we track, collect, and analyze assessment data to help us identify and address the needs of Carolina students. Also, we have prepared presentations as a resource for RAs on campus who want to inform their residents about health and wellness topics that are important to college students. You can find both links to both of these items to the left.

For more information about health and wellness topic, please visit [Campus Health Services Health Topics](#) [1].
