Graduate & Professional Student Programs

Student Wellness recognizes that to enhance the health of graduate and professional students, programs and initiatives must address the issues which most commonly impact the wellbeing of this student population.

Graduate and professional students experience a different academic dynamic, essentially because they are more isolated and operate on a more individualistic paradigm. As older students, oftentimes with families and/or with professional work obligations and children, there are different sets of concerns and emotional burdens. We provide proven and effective programming to support a healthy life experience and helping improve academic performance.
